PROFESSIONAL PROFILE

A motivated and results-driven individual combining a BSc. MIS Degree with a successful career in developing user-centric software applications and maintaining information systems spanning more than 4 years. Adopts a consultative development approach in spearheading projects from initiation through to completion meeting and exceeding client expectations. A dynamic communicator and team player, able to work well under-pressure to meet tight deadlines with/without supervision. Recently has gained interest in cyber security in the new world of remote work, post COVID.

May 2015 – October 2015

INNOVIA DIGITAL | North Cyprus – Nicosia (www.innoviadigital.com)

- Worked as a third hand in multiple projects, debugging apps, design implementation of some functions and also making scripts to accomplish repetitive tasks.

PROJECTS

www.nethouse.net

Nethouse and Kibrisonline Mobile Application

Worked as the team lead and developer to create 2 mobile apps for the sister ISP companies. For IOS and Android using flutter.
https://play.google.com/store/apps/details?id=netonline.kibrisonline.kibrisonline_hesabim_app

Nethouse Networks Online Dashboard and Website

Worked closely with a great team to develop the ISP customer dashboard and also the website

www.nethouse.net
www.online.nethouse.net

Netonline Dealer Panel

Dealer/reseller panel for Netonline written in php, mysql and javascript.

ofis.netonline.net

Ata Bilisim Management Dashboard

<http://atabilisim.management/login>

Used to manage inhouse accounts and tracking customer subscription expirations. I was mostly part of the design team, But it also involved looking into php and database calls.

Pane Yedek Parca

<http://panayedekparca.com/>

Involves inventory and price management of car parts online. Worked as part of a team to execute this project. Although part of the project is external proprietary software, we believe we did enough changes to call it our own.

Şefler Menü

<https://github.com/marshallfungai/sefler-menu-app>

Chefs menu is a flutter app which using QR code scanner get bring menus direct to your app while in a restaurant/bar/café. The php dashboard for this is also available in a repo because it was created with a colleague.

IVF Medical App

<https://github.com/marshallfungai/ivf-medical-app>

Medical app proposal for IVF hospitals to tackle the decline of walk in customers across the globe. Created in flutter it will also come with as assisted Laravel dashboard.

React Native News App

[www.github.com/marshallfungai/React-Native-News-App](https://github.com/marshallfungai/React-Native-News-App)

News app created with react native using an api from "www.newsapi.org". An experimental base code for use with News website i.e. Wordpress sites broadcast API endpoints for posts, which can be news posts.

Rental Mobile App

[www.github.com/marshallfungai/Rent-A-CAR_PhoneApp](https://github.com/marshallfungai/Rent-A-CAR_PhoneApp)

This app is using ionic framework. Its purpose is to pull available vehicles from a custom API to the client's mobile phone so as to keep them updated. And if certain vehicle is booked or already rented the customer will be notified.

Laravel Article API

<https://github.com/marshallfungai/LAREVEL-CRUD-API>

This was a base code for an API project based on Laravel, a php framework. The repo only contains the API code.

Chat App

[www.github.com/marshallfungai/angular2-node-socket-io-chat-app](https://github.com/marshallfungai/angular2-node-socket-io-chat-app)

Chat App built using Angular 2 and Node (Socket.io)

EDUCATION

CISCO Cyber Security

Expected 07/2023

Bsc in Applied Sciences (management information systems): CGPA - 2.90/4.00

2014

Eastern Mediterranean University – North Cyprus

Core Courses:

- Management Information System
- Internet/Web programming 1(client side),
- Internet/ web Programming 2 (server-side),
- Algorithms and Programming ,
- Structured Programming,
- Operating Systems
- Mobile information and device programming
- Understanding Human Social Behavior
- Business Processes and ERP Systems
- Cost Accounting
- Business Communication
- Data Structures and Applications,
- Computer Networks,
- Database Management Systems (oracle -SQL),
- Database Programming (PL/SQL),
- Java Programming
- Object Oriented Programming,
- Financial Management
- Production Management
- Statistics
- Marketing
- General Psychology

Cambridge GCE Advance Level: Business studies, Accounting, Economics

2009

Jameson High School

LANGUAGES

- English – speak fluently and read/write with high proficiency
